By maintaining IPM Accreditation with the IPM Council of Canada, Camelot can have a positive impact on the environment around us now and for the future. We have always strived to minimize chemical applications, but IPM makes us rethink how we deal with pests and where we deal with them as well. It helps educate people on different methods or thought processes on what and when to do something. It constantly keeps you focused on pest management and what we can do to maintain our turf quality with less pesticide application. The main thing it has done for us and will continue this current year is renewing the importance of some less utilized cultural practices to ensure we can encourage better health of the turf while relying less on chemical means.
